

IN-SITU MACHINING

Integrated Solutions to Piping Problems | www.patriot-int.com

When a workpiece is too large or fixed in application and therefore unable to be transported to a machine shop, In-Situ Machining comes into its own as a viable alternative in terms of capability and quality. In terms of cost, time and resource there can be a significant benefit.

Most forms of machining that are undertaken in a machine shop can be replicated on-site with a portable machine. Patriot International has a large range of In-Situ Machines for rental and also combined with a skilled machinist to deliver a complete service.

In-Situ Machine Capability:

Pipe Cutting

- Bevelling
- Counter Boring / Match Boring
- OD Turning

Flange Facing

- R.F. / RTJ
- Back Facing
- Trepanning

Milling

- Bed Plates
- Slot Drilling
- Exchanger Pass Bars

Drilling

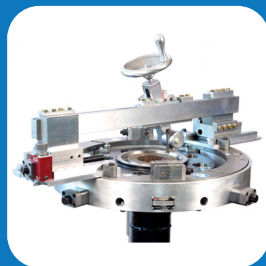

- Stud Removal
- Col Tapping

Line Boring

- Parallel Boring
- Spot Facing

Industries

- Oil and Gas: On- Offshore.
- Petrochemical
- Manufacturing
- Renewables
- Power Generation
- Marine
- O.E.M.
